

# GWK 0600

## GUY WIRE KIT

The AP Solution **GWK 0600 Guy Wire Kit** from Anchor Products helps keep your expensive equipment from being knocked around and damaged, or worse, flying across the roof, creating expensive leaks and consequential damages.

Sustained winds commonly exceed 50-60 mph throughout North America, which is enough to dislodge your rooftop accessories, blow your duct system off its base, move pipes, and tip over an exhaust stack, antenna, flagpole, or anything else you need to prevent damage to the equipment and your roof.

The U-Anchor 2000 Series Attachment by Anchor Products and the GWK 0600 have demonstrated performance in the harshest environments securing rooftop equipment in high wind conditions, including hurricanes and seismic events.

### ROOFTOP ACCESSORIES SECUREMENT

**ASCE 7-16 code requires all rooftop equipment to be bolted, welded, or otherwise positively fastened without consideration of frictional resistance.**

#### FEATURES:

- » Attaches safely to TPO, PVC, EPDM, asphalt and coated roofs without damaging the roof using a U-Anchor™ 2000 Series.
- » U-Anchors match roofing material type and brand.
- » All exposed components and hardware are stainless steel, aluminum, or other non-corrosive materials.
- » The 3/16" stainless steel 7x19 aircraft cable offers a breaking strength of approximately 3700 lbs. (Other wire rope options available upon request.)
- » Cables with GWK 600 Kit come standard at 10'. Custom length of cables up to 100' can be quoted and available upon request.

#### ADVANTAGES

- » The Guy Wire Kit provides extreme strength in securing rooftop equipment in high-wind and seismic events.
- » System is compliant with FM 4481 which requires all positive mechanical attachments for all "rooftop accessories."
- » AP Solution GWK 0600 Guy Wire Kit, using the strength and reliability of Anchor Products U-Anchor, provides the code compliant assurance that your rooftop equipment and accessories are secure.
