

The AP Solution **0330 Wall Pipe** securement is your solution to safely securing your system to the wall, vertically or horizontally. Wall mounting is a great alternative to a roof mounted pipe system, if permitted by your project design. It allows for more space on the roof, eliminates potential trip hazards and offers options to install one pipe or multiple ones as needed.

The Wall Mounted Pipe Securement System from Anchor Products provides a wide range of options to create the perfect solution for your pipe support and securement needs. Customize your system further by choosing the specific pipe clamps with sleeves or rollers to meet your design specifications.

The Wall Mounted Pipe Securement System by Anchor Products, using the U-Anchor attachment, is the only pipe support system on the market that is mechanically attached with a water-tight anchor.

PIPE SYSTEMS SECUREMENT

ASCE 7-16 code requires all rooftop equipment to be bolted, welded, or otherwise positively fastened without consideration of frictional resistance.

FEATURES:

- » The wall mounted pipe securement system is attached with the U-Anchor 3000 or 2000 Series Attachments and is easily customized for all your needs.
- » Advanced system incorporating U-Anchors strength to better secure pipes against high winds and seismic events.
- » U-Anchors when installed properly will perform as designed for the life of the roof without any harm to the roof material.
- » System is installed on the wall and allows for pipe runs up to 48" in width*. (**For greater than 48" wide a custom solution using a 3rd support is available)

ADVANTAGES

- » System provides custom solution to meet your needs.
- » Can be used to support one pipe or multiple pipes as needed.
- » Can easily be installed as a retrofit securement system on an existing roof and pipe project as needed to eliminate problematic pipe migration.
- » All exposed components and hardware are stainless steel, aluminum, or other non-corrosive materials.
